SkillMap

AI-Powered Skill Gap Detector & Career Readiness Engine

Closing the gap between 1.5 million graduates and job-ready talent — intelligently.

1.5M+	<20%	70%
Graduates/year	Job Ready	Screening Cost Cut

v1.0 · 2025 · Flutter · AI-Powered · Multilingual

THE PROBLEM

India's Career Crisis

The Talent Mismatch

1.5M+ engineering graduates yearly, yet fewer than 20% are job-ready. Graduates apply to roles they're under or over-qualified for — no tool objectively maps their profile to real market needs.

Expensive & Inaccessible Guidance

Career counsellors charge ₹5,000–₹50,000 per session. Scarce outside Tier-1 cities, leaving millions in Tier-2 & Tier-3 India completely unserved.

Company Screening Costs

Companies face slow, expensive screening despite a graduate surplus. Initial filtering is inefficient — costing thousands per hire with low quality signal on candidate readiness.

No single platform combines skill mapping + AI guidance + job discovery + community support.

CORE FEATURES

Built for Every Career Stage

AI Skill Gap Analyser

Maps your current profile against any target role and identifies the exact skills you're missing.

Personalised Roadmap

Week-by-week learning plan with curated free resources from YouTube, docs, and GitHub.

AI Interview Engine

Conversational AI interviewer — adaptive questions, real-time follow-ups, and auto-scored reports.

Job Scraper + Scam Detect

Live jobs from LinkedIn & Naukri with a Trust Score badge flagging fraudulent listings instantly.

Skill Swap Network

Peer-to-peer skill exchange — AI matches you with a complementary partner and auto-schedules sessions.

Smart Resume Builder

Auto-builds an ATS-optimised resume from GitHub, LinkedIn and certificates — with JD match scoring.

MORE KEY FEATURES

25 Features Across 3 Phases

Map-Based Job Discovery

Interactive map with radius slider, commute time overlay, and salary range filters.

Gamified Community

XP, badges, leaderboard and weekly challenges — a LinkedIn-style social layer for career growth.

Cheating detection during interview

Detects suspecious behaviour by face recognition.

Practical Experience

Based on the skill, user is given role based projects/real life experiences to build confidence.

Salary Intelligence

Role + location + experience salary ranges from scraped listings and anonymous submissions.

Certificate & Document Vault

Secure cloud storage for all certificates and docs — one-tap attach to any job application.

FEATURE SPOTLIGHT

AI Interview Engine

A fully conversational AI interviewer that adapts questions in real-time and produces scored reports — for candidates and companies.

- **Resume-parsed questions —** AI reads your resume before generating personalised questions
- **Real-time adaptive follow-ups —** Drills deeper on vague or incomplete answers
- **3 interview modes —** Technical · HR · Domain-specific
- **Auto-scoring —** Communication · Confidence · Technical accuracy · Relevance
- **Company B2B screening —** Activate as first-round filter — ranked candidate dashboard
- **Mock vs Live mode —** Practice unlimited, or use in a real job application
